

All Natural Toxin-Free

# Clean & Disinfect

**Go Green InStages** is pleased to offer a selection of all-natural environmentally friendly cleaning and disinfecting products. Take some simple steps to reduce the cumulative effects of your family's exposure to dangerous toxins. Our products are safe to use around children, the elderly, chemically sensitive individuals and contain no toxic chemicals.

**Antimicrobial Hand Sanitizers** are used in cases where soap and water aren't readily available. Bio-Citrus hand foam is a natural, alcohol-free alternative to traditional sanitizers. It effectively kills 99.95% of germs and does not dry out your hands like alcohol based products do. Great for children at school, in daycare, at the park or play center. Use it while out shopping, in the car, at the hospital or doctor visits.

**Natural Cleaners** are safe alternatives to traditional cleaners used in the home, at the office, for the car or at school. Our multi-purpose cleaner is all natural, fragrance free and safe for your family and the environment. This one product used at different concentration levels can replace many of the specific cleaners you currently use.

**Disinfectants** are used on a cleaned surface to remove germs. One of the best indicators of a product's safety is whether you need to wipe it off once you use it. Our disinfectants are food prep area safe. You simply "spray and walk away". Great for kitchen counters, cutting boards, toilettes, computers, phones and children's toys.
