

## BPA-Free, non-toxic **Stainless Steel Bottles**

**Go Green InStages** is pleased to offer a wide selection of stainless steel drink bottles, sippy cups and food jars that are Bisphenol-free and non-leaching. Bisphenol-A is a chemical found in some plastic bottles and sippy cups and has been linked to a variety of health risks especially for babies and small children.

Not only are stainless steel bottles better for your health, they are more eco-friendly as well. Using stainless steel bottles instead of single use plastic ones dramatically reduces the amount of waste that ends up in our landfills and oceans.

**Klean Kanteen** stainless steel bottles come in a variety of sizes, cap styles and colors to meet a range of needs. Whether you are looking for a bottle to take to the gym or workplace, a reusable beverage container for school lunches or a sippy cup for the daycare, the Klean Kanteen product line offers a suitable choice.

**Foogo-Thermos** products are stainless steel and insulated to keep beverages and food hot or cold for hours. They have a line of sippy cups, straw bottles and food jars that come in a choice of blue or pink colors. The kid-proof design of these high quality products are made to withstand the daily wear and tear that they will be subjected to.

**SAFE Sippy Cups** are single-walled stainless steel bottles designed with kids in mind. The protective sleeve provides some insulation for cold beverages. Handles make the sippy cup easy to hold and are removable once your child is big enough to grip the tapered waist of the bottle. These sippy cups come in either pink, blue or green.
