

Waste Free Lunch Programs

Make your school lunches waste-free!

One student produces 20-40 kgs (45 to 90 lbs) of garbage from disposable lunches per year. Making a few simple changes in how lunches are prepared can dramatically reduce the amount of waste one child generates.

Go Green InStages carries a selection of products that make these adjustments easy to make.

How To Pack A Waste Free Lunch

DO

- Pack food in reusable containers
- Buy in Bulk
- Use refillable drink bottles
- Pack reusable utensils instead of disposable ones
- Use cloth napkins instead of paper
- Pack lunches in lead-free reusable lunchboxes

DON'T

- Avoid packing sandwiches in plastic baggies
- Don't use individually wrapped items
- Avoid single serving juice boxes
- Stop using plastic utensils and disposable napkins
- Don't use PVC lined lunch boxes or disposable plastic bags to carry lunches
